Architects
Archiles

Engineering Office
Stedec, Claeys

Construction period
3 years

Start work
09-2009

Brabo 1 is a public-private partnership (PPP) executed in a DBFM procedure, in which we not only took care of the construction, but also the design and financing of the project. Moreover, we are responsible for maintenance for the next decades: 35 years for the non-tram section and 25 years for the tram section.

Brabo 1 is the collective name for:

- construction of tram lines Mortsel-Boechout and Deurne-Wijnegem
- construction of a tram depot for 53 trams, an office building and a workshop
- construction of service buildings at the end points of the 2 tram lines with associated Park&Ride, waiting infrastructure and canopies
- construction of traction stations.

In addition, three existing bridges in Mortsel were reinforced and extended to allow tram traffic.
