Willemen General Contractor, Cordeel

Surface area above ground
8 044m²

Construction period
1 year 6 months

Start work
10-2015

End of work
04-2017

The Gesubsidieerde Vrije Basisschool and the Sint-Jozefinstituut in Borsbeek were faced with a double problem. There was a severe lack of space and the school buildings were very dilapidated. That is why we decided to demolish the old school and build two new buildings in its place. One of the buildings is the new school building for all secondary education. It has an area of 7,023 m² and can accommodate 850 students. The second building houses the cafeteria and a 982 m² sports/polytechnic hall for the primary school. In addition to these two buildings, there is also a technical room with the distribution cabin and the meters for the utilities.
