Scheldelaan 600  
2040 Antwerpen Belgium  
Antwerpen BE

**Client**  
BASF Antwerpen

**Special features** [BIM](#)

**Construction period**  
1 year 5 months

**Start work**  
01-2019

**End of work**  
06-2020

Franki Construct has built a new laboratory in the port of Antwerp on the BASF site, which is the largest chemical production centre in Belgium.

The building measures 61 m x 35 m and is 16 m high. The ground floor and first floor are made from concrete. Columns, beams, arches and concrete façade panels are used on the ground floor. The “technical floor” is a steel construction, and the first and second floors have metal cladding. The laboratory is equipped with a green roof.

### Willemen Construct

Boerenkrijgstraat 133  
2800 Mechelen, Antwerpen
