Ellermanstraat 63
 2000 Antwerpen Belgium
 Antwerpen BE

Client

AP Hogeschool Antwerpen

Architects

POLO Architects

Engineering Office

Jan Van Aelst (stabiliteit), VK
 Engineering (speciale technieken)

Start work

03-2020

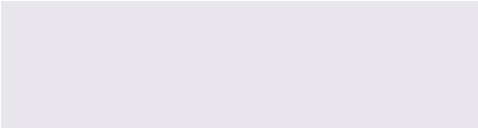

Construction of a new campus for AP University of Applied Sciences and Arts. The Viaduct Campus will offer room to 2,000 students across 7,500 m² of space. The new campus borders the park, and this green theme is extended into the building through the large windows. Parking space for 50 cars and 400 bicycles will be provided underneath the new building. During the design phase, special attention was paid to the environmental footprint of the project. Passive sun protection, solar panels, green roofs and exhaustive insulation will be integrated into the building to create a pleasant indoor climate. The centre of the building will feature a real garden that will give the impression of an 'urban jungle'.
