Client
Brusselse Vervoersmaatschappij (MIVB)

Architects
Altiplan

Temporary partnership
Franki Construct, Kumpen

Engineering Office
Sweco Belgium, Transamo

Surface area above ground
27 000m²

Special features BREEAM

Construction period
2 years 7 months

Start work
09-2015

The Marconi tram depot has 22 tracks and offers space for 75 trams in the storage area and a further ten in the maintenance hall. A new building houses the administrative services. During construction, particular attention was paid to the harmonious integration of the building into its green surroundings and the ecological aspect. For example, the depot has a basin that collects rainwater for the sanitary facilities and tram washing, as well as a heat pump, 600 solar panels, smart LED lighting, etc. Marconi has BREEAM-rating "Very Good".

website

Willemen Infra is a leading, Belgian road construction company with a regional presence in both Flanders and Wallonia. An important asset is that we have all aspects of the construction process under our own management and thus fully control the execution. Moreover, our team of 1,000 well-trained and experienced employees are willing to work at night and over the weekend to make sure they get everything done in time. In addition, thanks to our own COPRO and CSC-certified production and recycling sites, we are one of the leading producers for asphalt and road concrete.
