

Tram depot Marconi - Brussels

Activities

Buildings
Industrial & logistics
Civil Engineering
Railway infrastructure & stations
Soil remediation

Contractors

Franki Construct
Willemen Construct
Willemen Infra

Special features

Noise barrier of 50x3m, absorbing ballast, noise insulated rails, steel framing, soil sanitation

Location

Ruisbroeksesteenweg 73, Ukkel, Brussels, Belgium

Client

Brusselse Vervoersmaatschappij (MIVB)

Architects

Altiplan

Temporary partnership

Franki Construct, Kumpen

Engineering Office

Sweco Belgium, Transamo

Surface area above ground

27 000m²

Construction period

2 years 7 months

Start work

09-2015

End of work

The Marconi depot will be built on a site mainly located on the territory of Uccle and partly on that of Forêt. The site borders on the Flemish-Brabant community Drogenbos and measures 3.7 hectares, of which 2.3 hectares will be covered. The new depot will house 75 trams of the 3000 and 4000 type. The maintenance workshop is going to be able to cope with 15 trams at the same time. In addition, Franki Construct and Kumpen will also build an administration building with a reception hall and recreation room for the tram drivers.

The depot is going to be constructed in the context of the European TramStore21 project, in which the cities Rotterdam, Dijon and Blackpool also take part. The project can count on European financial support and its objective is to promote urban sustainability while respecting the environment. Therefore the building materials will be attuned to the green setting and in the construction much attention will be paid to energy control, waste water and maintenance of the buildings. Natural light, noise insulation by means of applying the very latest techniques to reduce noise and vibrations and recovery of rain water guarantee an extremely sustainable tram depot.

Franki Construct and Kumpen also built the provisional open-air depot on the site along the Ruisbroeksesteenweg. This provisional depot is in operation now and can house 28 trams (photos). The overall investment amounts to more than 50 million euro.
