

LPG ethane tank storage park ATPC - Antwerp

Activities

Civil Engineering
Heavy industry

Contractors

Franki Construct
Willemen Infra

Executed works

Concrete foundations

Location

Beliweg, Antwerpen, Antwerpen,
Belgium

Client

ATPC

Construction period

9 months

Start work

10-2018

End of work

07-2019

The Antwerp Terminal & processing Company, or ATPC, is significantly expanding its storage installation in the port of Antwerp used to hold petroleum and petrochemical products. An LPG ethane tank storage park to hold 30,000 m³ of products will be built. The super-sized tanks are designed to store ethane, propane, butane, and derived products. This investment makes ATPC a significant player in the ARA storage market for LPG and ethane. Furthermore, the ATPC terminal quartered in the Beliweg in the port of Antwerp is able to handle VLGC's, or Very Large Gas Carriers.

The Antwerp Terminal & Processing Company stands for the former Petroplus and RBP companies. So, it was one of the oldest industrial complexes in the port. ATPC is now part of the Dutch Vitol Group in Rotterdam and the Malaysian shipping company MISC. The two partners jointly exploit a large global network of oil processing companies and storage facilities.

Franki Construct lays the concrete foundations. Willemen infra handles the infrastructure work.

Some facts:

- 9.0 m³ concrete
- 1.600 tonnes of reinforcement
- 240 poured M80 anchors and 114 M64 units
